

Short Note To Libertarians

Believe in the Market, hey?
Belay regulation, a form, yet

another, of vile government
tyranny? Well, didn't work.

Ah hah! you exclaim, that's
only because information
wasn't free and open. Thus,

WOULD work if only...! Uh huh,
if the most scabrous pirates ever
to despoil had only told us foils

what they were up to! "We're bund-
ling subprime mortgages! Just
a marvelous way of screwing
just about everybody!"

Hey, Libertarians, wake
the fuck up! (Repeat as many
times as necessary.)
